Annexure-1

Disclosure under Regulation 30 of the SEBI Listing Regulations, read with Schedule III thereto and SEBI Circular No. CIR/CFD/CMD/4/2015 dated September 9, 2015

a.	name of the entity awarding the order(s)/contract(s);	Andhra Pradesh Government
b.	significant terms and conditions of order(s)/contract(s) awarded in brief;	i) Contract awarded for Aerial photography data acquisition generation and supply of ORI for mapping. ii) Resurveying with modern technology using CORS Network, GNSS Receiver, and Aerial Systems iii) Work to be commenced immediately
c.	whether order(s) / contract(s) have been awarded by domestic/ international entity;	Domestic Entity
d.	nature of order(s) / contract(s);	Notification of Award to the Company by Government of Andhra Pradesh
e.	whether domestic or international;	Domestic
f.	time period by which the order(s)/contract(s) is to be executed	The project is planned to be finished by the end of financial year 2022-23
g.	broad consideration or size of the order(s)/contract(s);	Approx. Rs. 46 Crores
h.	whether the promoter/ promoter group / group companies have any interest in the entity that awarded the order(s)/contract(s)? If yes, nature of interest and details thereof;	Promoters / Promoter group / group companies have no interest in the entity that awarded the contract.
i.	Whether the order(s)/contract(s) would fall within related party transactions? If yes, whether the same is done at "arms length	The contract would not fall within related party transaction.

Annexure- 2

MEDIA RELEASE

Genesys International Corporation awarded INR 46 crores for Land Titling Project by the Andhra Pradesh Government.

Mumbai, October 11, 2022: Genesys International Corporation, one of the leading homegrown players in the geospatial services sector, has won a INR 46 crore project for resurveying with modern technology using CORS Network, GNSS Receiver, and Aerial Systems from the Andhra Pradesh government. The project will make use of the company's recently launched Genesys Constellation, which is India's most comprehensive range of aerial, mobile, and terrestrial sensors that converts everyday objects into data sources.

The deregulation of geospatial space has provided the industry a significant boost, and it will enable companies like Genesys better serve the public and private sectors. Projects like land titling digitalization are examples of how the public sector is leveraging the latest technologies/initiatives enabled by the deregulation. As part of the project, Genesys Constellation will demarcate residential zones, farms, and other natural and infrastructural characteristics, as well as property mapping and data digitization across the state. The project is planned to be finished this fiscal year.

Mr. Sajid Malik, Chairman and Managing Director of Genesys International Corporation Limited, commented on the collaboration with Andhra Pradesh Government, saying, “We take great pride in our involvement in this important initiative that will modernize Andhra Pradesh’s land records and build a digital infrastructure. For Genesys, key digital infrastructure layers is one of our key focus areas and we are aggressively working with stake holders to solve their pain points.”

Mr. Malik further added, “Accurate land titling is a crucial need of the country to establish clear ownership of property in rural inhabited (Abadi) areas by mapping land parcels and providing a ‘Record of Rights’ to village household owners. The property owners are issued legal ownership cards (Property cards/Title deeds) after ascertaining the plot boundaries accurately.

The resurveying is enabled by the sensors in the Genesys Constellation that provide the biggest swath in the world, which is generated by a single frame that captures more than 25000 pixels. Due to its capacity for acquiring highly accurate data sets at high speeds, it will be able to reduce long-standing problems with land titling and the ensuing legal issues with land records, which obstruct the acquisition of land for numerous infrastructure projects and present serious difficulties.”

Genesys, which has partnered with companies like Google, ESRI and Bentley to launch services such as ‘Street View’ and ‘3D City Digital Twin Solution’, is hopeful that this initiative will further gain momentum in other Indian states and usher in an era of modernization in the land recording.

About Genesys International Corporation Limited

GENESYS

Headquartered in Mumbai, India, Genesys International is an advanced mapping solutions company. With state-of-the-art infrastructure and a growing list of Fortune 500 and SME clients, Genesys International is well-positioned to play a significant role in the Indian Map content and global GIS industry. The company has been serving clients across the globe, counting some of the world's leading companies as its clients. The services and solutions of Genesys International encompass technologies of 2D/3D mapping, HD mapping for Autonomous Driving, and Artificial Intelligence/Machine Learning for varied applications and industries, including Urban Development, Telecom, Disaster Management, Agriculture, Navigation, etc. Established in 1995, Genesys has more than 2000 professionals across four offices – Mumbai, Jaipur, Hyderabad, and New Delhi in India.
